

Introduction to Digital Compact cameras

The Introduction to Digital Compact cameras course is 2 hours in length, and covers an understanding of the key settings that owners of compact cameras need to understand and use in order to get the most out of their cameras. Despite the increasing level of sophistication of modern day compacts, there are still just a limited number of features that need to be understood and used in order to begin using the camera to get high quality, creative results. All you need on this two hour course is your camera with a fully charged battery.

Introduction to Digital SLR cameras

The Introduction to Digital SLR cameras course is 2 hours in length, and covers an understanding of the key settings that owners of SLR cameras need to understand and use in order to get the most out of their cameras. Despite the increasing level of sophistication of modern day SLR and mini-SLR cameras, there are still just a limited number of features that need to be understood and used in order to begin using the camera to get high quality, creative results. All you need on this two hour course is your camera with a fully charged battery.
